

5V PANEL

5V Panels are a simple, beautiful, strong choice for your residential and light commercial roofing needs. The classic design encourages use in a variety of projects, and the strength and durability ensure a long-lasting, low maintenance roof.

Did You Know...

Galvalume® coated steel roofing panels are protected by layers of metallic and polymer coatings. Industry studies have repeatedly shown them to outperform the corrosion resistance of other coated metals. They are available with warranties as long as 50 years.
