TCM

The Greener Choice for Your Roofing and Building Systems!

Did You Know...

Steel is the most recycled material on the planet. It is energy-efficient which makes it cost-effective over the life of the product. Building with steel can also increase your **LEED** (Leadership in Energy and Environmental Design) sustainability rating in 5 out of 6 categories. This rating can earn you special bonuses including tax breaks for environmental responsibility. For more information, visit Triad Corrugated Metal and ask about incentives to build green.

Why settle for low-quality answers to your high-quality building projects? Triad Corrugated Metal's Building Systems are available in a wide variety of applications and colors, perfect for any commercial, agricultural or residential project. Our Building Specialists are available to assist you throughout the entire building process, from beginning to end, and can offer many design options from which to choose. If simplicity is your goal, we have numerous stock plans that will meet your demands. Do you have a vision for your final building? Let our Design Team help realize that vision with a set of custom designed plans. For the weekend warriors, choose from one of our building kits that have everything you need to construct the project yourself. Visit Triad Corrugated Metal today and let us help you build your dreams.

The Design Team

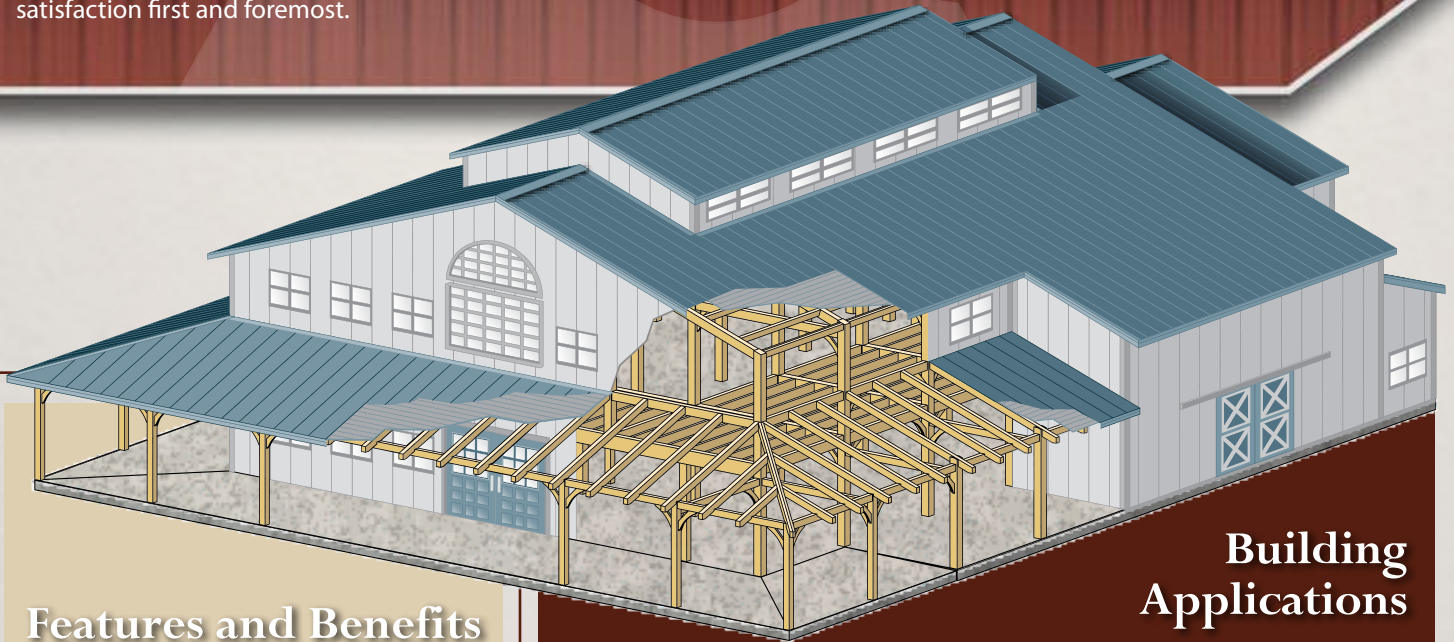

The Triad Corrugated Metal building systems design team is dedicated to ensuring that our customers develop a design that meets their needs and fits the vision for their building. The members of our design team have years of experience in design, estimating, architecture and construction. The team not only understands the challenges you face in designing and constructing your building but they are equipped to help you overcome any of those challenges.

At TCM we understand that each project is unique and requires special attention. Our process ensures that each customer gets exactly what they need out of the design of their building. Not only do we help you design the building system to fit your specific needs but we work with your budget to maximize the benefit of each dollar you spend.

Our design team is ready to help you plan your next building.

POST FRAME BUILDING

When you choose a Post Frame Building from Triad Corrugated Metal, you're choosing a structure that is built with the highest attention to detail, building materials that are unmatched in the industry, and a business relationship that values customer satisfaction first and foremost.

Features and Benefits

- *Great flexibility in design options*
- *Meets building codes and requirements*
- *Lower square foot price than stick built*
- *Performs well in high winds and seismic load conditions*
- *Factory direct pricing*
- *Quick turn around times*

Building Applications

Horse Barns, Garages, Retail Stores, Home Shops, Agricultural Buildings

Many accessories to choose from...

TCM offers a wide range of accessories to complement your post frame building project. We place animal safety at the top of our list with durable, rugged, time and horse tested stall doors. Scratch and dent resistant heavy-duty steel framed walk-in doors exude beauty and security in one package. The tough, corrosion resistant paint on our pre-assembled roll-up doors will bring years of beauty and enjoyment to your new building. Cap the structure off with our maintenance-free vinyl insulated glass windows for a fresh new look at post frame buildings from Triad Corrugated Metal.

COMPONENTS | OPTIONS | ACCESSORIES

AG Panel

The durable and rugged AG Panel is the backbone of the Triad Corrugated Metal Post Frame Building System.

Sliding Door Systems

Made with heavy duty galvanized steel horizontal girts, these doors offer superior performance and animal safety for many years.

Yellow Pine Lumber

Southern Yellow Pine is the strongest structural softwood lumber species with the highest design values of commonly utilized wood species.

Fasteners

We carry the highest quality fasteners at reasonable prices. Our incredible selection can help your building project cruise along to completion.

Engineered Trusses

Engineered roof trusses minimize material cost and dry-in time while creating a structurally sound building.

Skylight Panels

Available in standard lengths, our translucent skylight panels have the same profile as the corresponding roof panels for seamless integration.

Variety of Colors

TCM has a wide range of colors to choose from for all our metal products. Choose from Classic or Premium with color-fast warranties.

Garage Doors

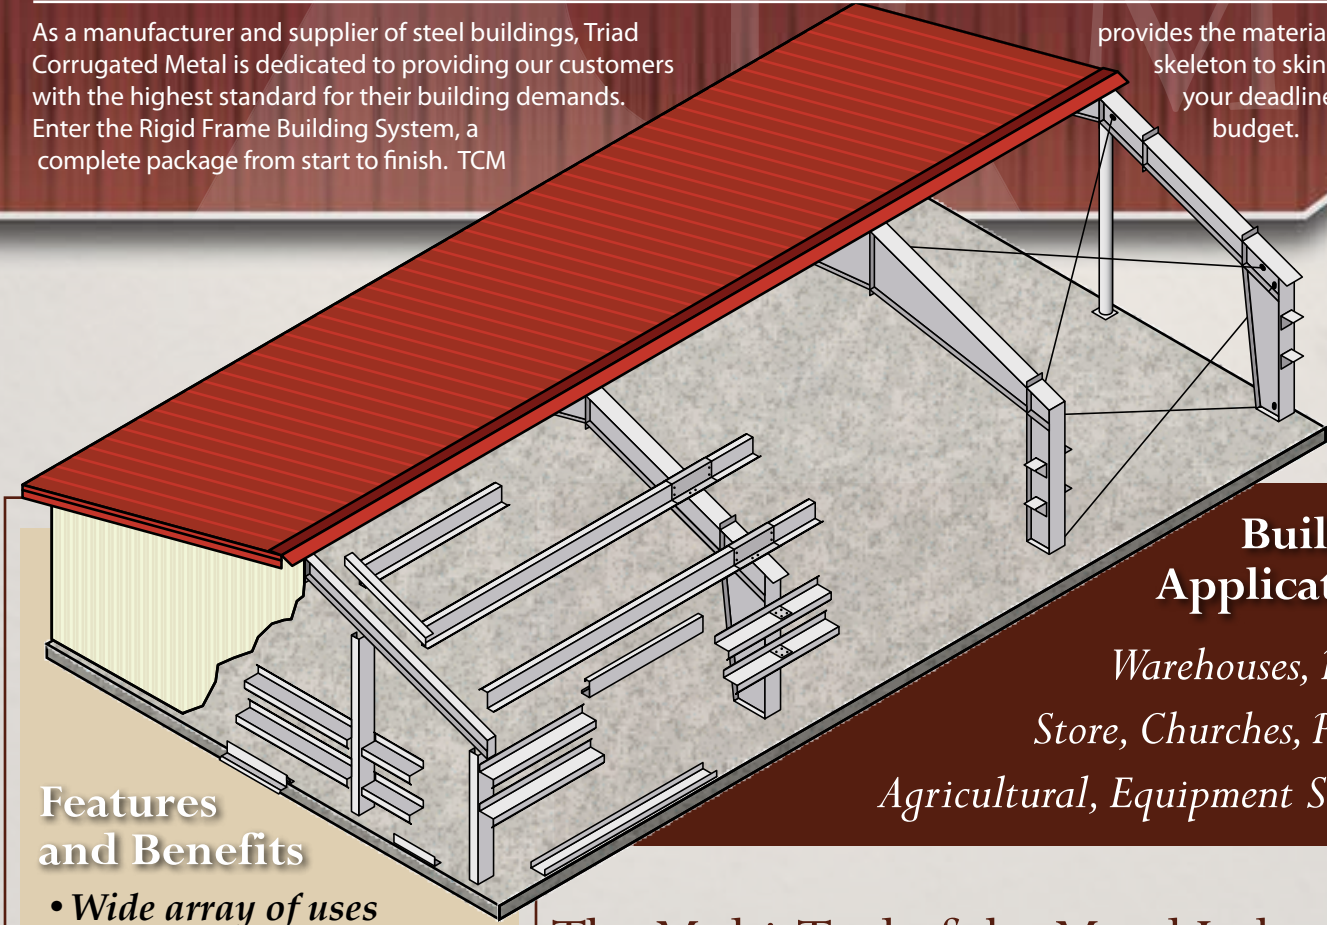

TCM carries a complete line of sectional and cannister steel doors that offer security and durability to any building project.

RIGID FRAME BUILDING

As a manufacturer and supplier of steel buildings, Triad Corrugated Metal is dedicated to providing our customers with the highest standard for their building demands. Enter the Rigid Frame Building System, a complete package from start to finish. TCM

provides the materials from skeleton to skin to meet your deadline and your budget.

Features and Benefits

- *Wide array of uses*
- *Cost-effective and efficient*
- *Computer aided design allows for flexibility in design*
- *Factory direct pricing*
- *Quick turn around times*

Building Applications

Warehouses, Retail Store, Churches, Plants, Agricultural, Equipment Shelter

The Multi-Tool of the Metal Industry...

A Rigid Frame Building system from Triad Corrugated Metal won't just suit your needs...it will exceed them. Our systems are created to meet a variety of demands from agricultural uses and equipment shelter to recreational centers and worship spaces. Don't limit your building project. Let Triad Corrugated Metal cover a variety of options with our Rigid Frame Building systems.

COMPONENTS | OPTIONS | ACCESSORIES

R Panel

The R Panel from Triad Corrugated Metal meets and exceeds a variety of needs for the demanding builder.

Walk-In Doors

A metal door from TCM is the perfect combination of beauty and functionality.

C & Z Purlins

These light weight sections used widely in steel buildings cause less load on the roof while offering greater stability.

Fasteners

We carry the highest quality fasteners at reasonable prices. Our incredible selection can help your building project cruise along to completion.

Clips

TCM provides the clips for the Rigid Frame Building System to ensure quality performance over the life of the structure.

Skylight Panels

Available in standard lengths, our translucent skylight panels have the same profile as the corresponding roof panels for seamless integration.

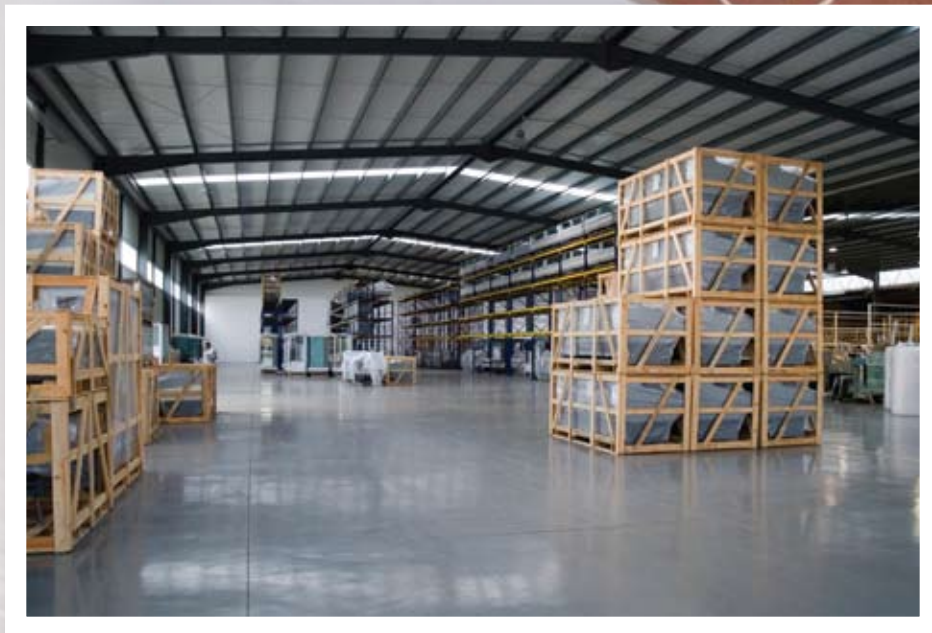

Variety of Colors

TCM has a wide range of colors to choose from for all our metal products. Choose from Classic or Premium with color-fast warranties.

Insulation

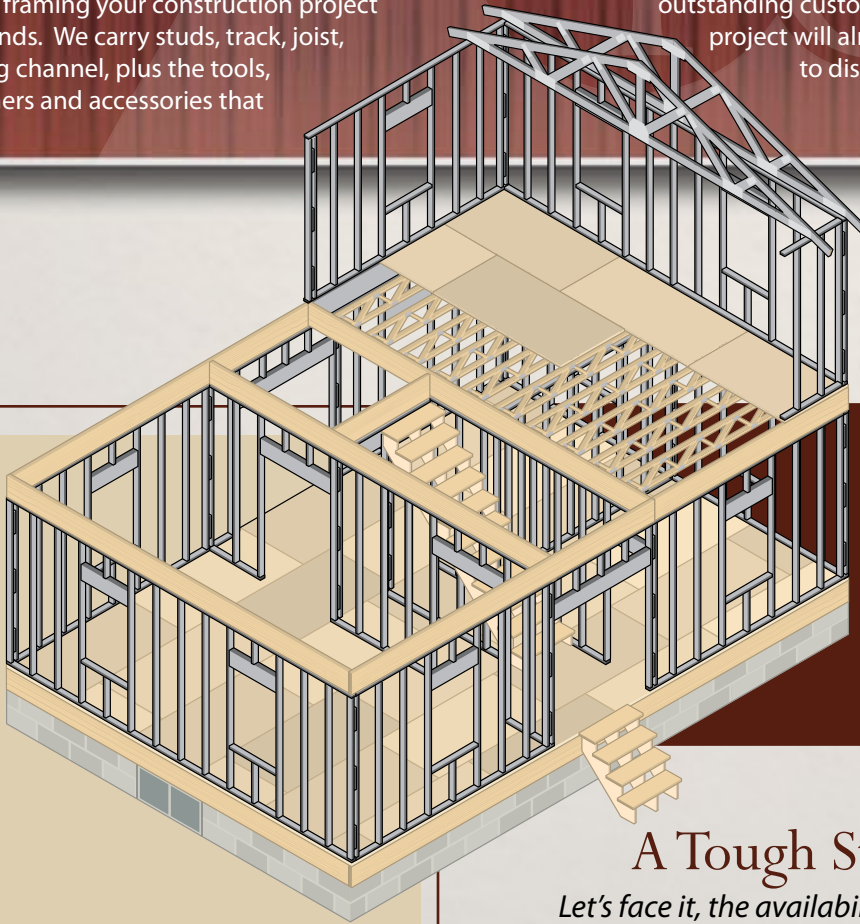

Saving money on energy bills is important to everyone. Be sure to ask about dollar-saving ideas with insulation for your custom building.

STEEL STUD BUILDING

Triad Corrugated Metal is the one-stop for all the light-gauge metal framing your construction project demands. We carry studs, track, joist, furring channel, plus the tools, fasteners and accessories that

you will need to get the job done. Top all this off with our outstanding customer service and custom design team...your project will almost seem to build itself! Call TCM today to discuss your building project needs.

Building Applications

*Garages, Homes,
Commercial Applications,
Multi-Story Structures,
Offices, Interiors / Upfits*

A Tough Standard to Beat...

Let's face it, the availability of quality lumber is diminishing.

With renewable and eco-friendly building being the new standard, steel studs are the logical replacement to wood framing in home and commercial construction. There are many advantages to using steel studs versus traditional stick-built: steel studs are perfectly straight, don't shrink or split, are light and easily stored, and are fire, insect and rot resistant. Couple that with the fact that steel studs are very affordable and you have a tough standard to beat.

Features and Benefits

- *Design a building to match your home and landscaping*
- *Quick assembly*
- *Higher quality control than a stick frame building*
- *Factory direct pricing*
- *Quick turn around times*
- *All light-gauge framing materials are ICC Certified*

COMPONENTS | OPTIONS | ACCESSORIES

Stud & Track

TCM's studs are available in 14-25 gauge and sizes ranging from 1.5"x 3.5" to 2.5"x10". TCM is ICC Certified and can customize lengths to fit your needs.

Metal Roofing

TCM offers both concealed and exposed fastener panel systems, available in 56 colors. We also offer metal shingles.

Vinyl Siding

TCM is proud to offer the Crane family of siding products, along with Alsco Coil Stock.

Fasteners

We carry the highest quality fasteners at reasonable prices. Our incredible selection can help your building project cruise along to completion.

Engineered Trusses

Our metal trusses are engineered to fit your specifications.

Clips

We carry a variety of clips to suit the wind load needs of your particular area. Studs available at TCM include C & Z clips, 90° and 2x2 clips in a variety of gauges.

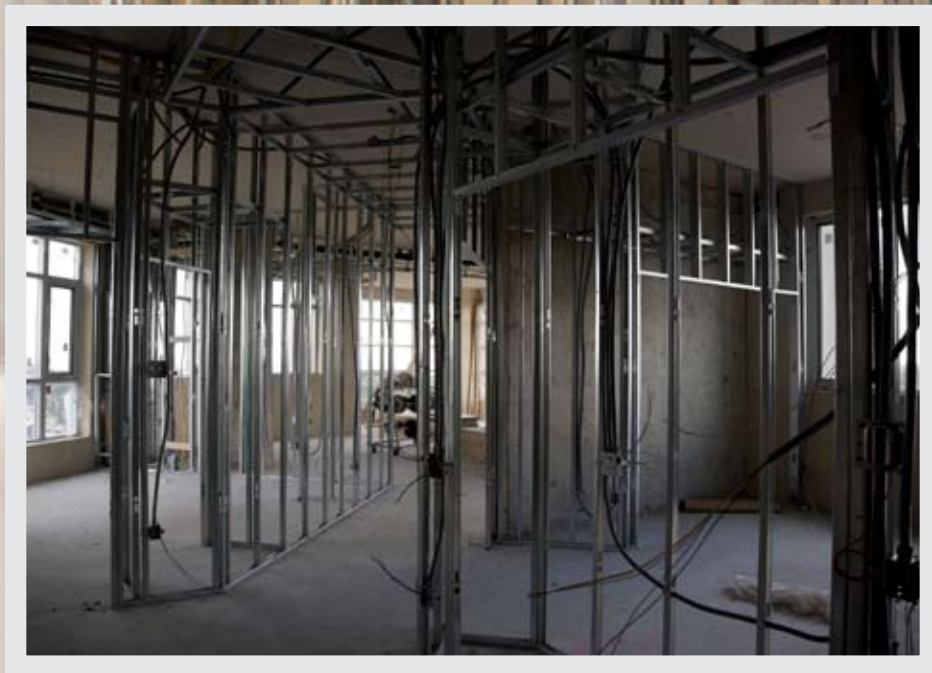

Variety of Colors

TCM has a wide range of colors to choose from for all our metal products. Choose from Classic or Premium with color-fast warranties.

Insulation

Saving money on energy bills is important to everyone. Be sure to ask about dollar-saving ideas with insulation for your custom building.
